FLAMELESS CANDLES

Join the LED revolution with Eledea flameless candles

The gently flickering candlelight of the Eledea flameless candles helps to create a restful and inviting ambience in any home, hotel or restaurant, with the added benefit of ensuring a clean, smoke-free environment.

Eledea flameless candles are perfect for restaurants as they save costs on candles and improve air quality owing to the absence of the harmful chemicals that are released by regular wax candles.

Eledea flameless candles are safe for anyone to carry by hand as they aren't hot to the touch and the 'flame' cannot burn people or materials, ensuring they meet key safety requirements for adults, children and pets, in addition to creating a beautiful ambience in any décor environment.
